For the latest updates and more information, visit our website: <https://moritz-kenk.eu>

Our services not only involve the production of casings but also complete the structural configuration, line cooling design (i.e., installing air conditioning or fan systems), cable management solutions, ...

The Base Station Energy Cabinet is a fully enclosed, weather-resistant telecom energy cabinet designed to provide reliable power distribution and battery backup for outdoor communication networks.

In short, ZTT is committed to providing high-quality and customized power solutions for the global communication industry with its comprehensive advantages in communication power system design, ...

Support max. 4 cabinets in parallel, friendly for medium-sized project integrators.

Designed for low-power applications ($\leq 100W$) with galvanic isolation, our auxiliary power supply is a key component in both industrial and photovoltaic (PV) systems. It operates efficiently across a wide ...

Our base station cabinets can directly power nearly any communication equipment they house. The design of our racks and cabinets allow for high integration with different backup time and easy ...

Strong Compatibility: The battery cells meet the certification requirements of domestic and foreign authoritative institutions such as the power and energy storage GB standards, UL, IEC, BIS, JET, ...

A power efficient design is required that supplies both the higher voltage analog circuits and multiple tightly regulated low-voltage supplies for the high-speed digital communications ASICs and FPGAs.

Up to 1500VDC and 1000VAC - enclosures that safely distribute electrical power from the main supply to various parts of the system. Using your desired PLC or computer platform and HMI screen or manual ...

They feature power supply, distribution, and protection equipment as well as radio systems and passive or
