A solar panel system is being built on the 424 hectares of extraterritorial land in Ponte Galeria, which within a year will make the Holy See the first zero-emission state in the world.

Now, with Pope Francis" further commitment to green energy, more solar panels are appearing in the Vatican City, starting with the Courtyard of the Corazze entrance. The installation was done by Italian ...

The Vatican"s recent tender announcement for a photovoltaic curtain wall installation marks a historic shift toward sustainable architecture in religious institutions.

One of the most notable solar projects in Vatican City is the solar roof of the Paul VI Audience Hall. The photovoltaic panels installed here generate approximately 300,000 kilowatt-hours of energy annually.

The Vatican"s solar shift is a culmination of a political and spiritual mission years in the making. In 2024, the late Pope Francis issued an apostolic letter ordering the construction of an agrivoltaic solar plant ...

A transparent, luminous solution of cutting-edge technology and energy efficiency, with a modern design and, last but not least, a pleasant visual impact: a model of harmonious and ...

The solar energy system covers the massive roof of the "Nervi Hall", where Pope Benedict XVI holds general audiences. The 2,400 panels, designed by a Germany company, will heat, light and cool the ...

Vatican City may be the smallest sovereign state in the world, but it is also one of the greenest. It has long been an exemplar for tackling climate change through its approach to renewable energy.

One of the Vatican"s most notable initiatives is the expansion of solar energy systems across key locations, including the entrance to the Vatican Museums and the Vignaccia area.
