U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday. The ...

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after discovering undocumented 4G/LTE modules and other wireless ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of them said. ...

Rogue communication devices have been found in some Chinese solar power inverters and batteries, two people familiar with the matter told Reuters, raising concerns of potential security risks...

Over the past nine months, "rogue communication devices" not listed in product documents were found in solar power inverters and batteries from several Chinese suppliers, according to sources...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after discovering undocumented 4G/LTE modules and other ...

Unknown communication devices were found in Chinese-made solar inverters, batteries, EV chargers, and heat pumps. Experts say these rogue components could remotely shut down or ...

Batteries of solar-powered communication cabinets flooded

U.S. security experts have reportedly uncovered undocumented communication devices inside Chinese-made solar power inverters -- hardware that's widely used to support renewable ...
