Enhance your solar energy solutions with CloudFilm's Photovoltaic Backsheet Film, providing you with superior protection and efficiency.

Coveme develops and manufactures multilayer and monolayer polymer laminates for the protection of solar panels. These laminates, marketed under the company's dyMat[®] brand, provide electrical ...

High tack adhesive film protects photovoltaic module glass, aluminum, and various metals from damages. Use our residue-free film tape during shipping, handling, and production line processes. ...

DUN-SOLAR PPE+ is an all-polyester film lamination designed to be used as the backsheet for solar panels. DUN-SOLAR TPE is a DuPont(TM) Tedlar[®]-based product well-regarded for its fluorinated film ...

Our front sheet ETFE film provides high levels of resistance to chemicals and weathering as well as low flammability, stress crack resistance, and insulating properties in solar photovoltaic panels.

NOWOFLON ET solar energy is a fluoropolymer film (ETFE), which was developed specifically as a convection barrier for solar collectors, as well as for the surface protection of photovoltaic modules.

The plastic film adhered to solar light cells is primarily a protective layer, crucial for shielding the delicate photovoltaic material from environmental damage, such as moisture, UV radiation, and physical ...

New solar panels often arrive with protective film--but should it stay on? This comprehensive guide explains the crucial difference between factory shipping films (which must be removed) and ...

DuPont(TM) Tedlar[®] is a highly versatile, polyvinyl fluoride film that provides a long-lasting finish to a wide variety of surfaces exposed to harsh environments while its inert, non-stick properties make it an ...

Whether it's for use with standard, fast or ultra-fast cure encapsulants and laminating processes, Flexcon

Blue film for photovoltaic panels

MultiGuard®; multi-layer backsheet products offer long-life UV and moisture protection and ...
