Transformation of AES Galabovo into a large-scale energy storage facility using proven technology implemented in concentrated solar power plants (CSP) using molten salts

Another development that can boost battery storage in Bulgaria is a recent update of national legislation to include battery energy storage systems as a component of the grid.

Bulgaria is among the leaders in the European Union in terms of newly installed battery energy storage capacity. This is shown by data from SolarPower Europe for 2025, cited by the ...

In his words, in addition to being home to the largest battery in Europe, Bulgaria will rank among the countries with the largest number of energy storage installations in the Southeast European region.

Developers of 82 standalone battery storage projects in Bulgaria, for an overall 9.71 GWh in capacity, got approval for EUR 587 million in subsidies from the Ministry of Energy.

The under-construction capacity was awarded under the initial RESTORE call, which made available approximately BGN 1.15 billion in EU-backed grant funding. The announcement ...

The RESTORE tender is funded under Bulgaria's National Recovery and Resilience Plan (NRRP), which aims to significantly increase the share of energy from renewable sources in the ...

Bulgaria's Ministry of Energy has approved EUR588 million in funding for 82 standalone battery energy storage projects, totaling nearly 9.7GWh of usable capacity. The final decision, ...

Bulgaria is taking bold steps toward a greener energy future, having recently wrapped up its most ambitious energy storage tender to date.

Bulgaria retrofits and installs energy storage batteries

Bulgaria became the EU's fastest-growing market for battery energy storage systems (BESS) in 2025, installing close to 2,500 MWh of new capacity, and is poised for a four- to fivefold ...
