-----

The DRC holds a substantial amount of the world's cobalt reserves, a key material in lithium-ion batteries. According to a study published by the Africa Policy Research Institute (APRI), ...

AMW 2025 will also spotlight Africa's growing lithium production capacity and its rising contribution to the global battery mineral supply chain, as several first-production milestones are ...

BlueOval Battery Park Michigan remains on track to begin production of lithium iron phosphate (LFP) batteries in 2026 for Ford's future electric vehicles, the automaker said.

In this webinar, you will learn about the major roadblocks to achieving Quality 4.0 in lithium-ion battery production - and the latest solutions. Traditionally, CT scanning is too slow for production environments.

Zimbabwe is the only African country that's a top 10 producer of lithium, but companies are exploring other parts of the continent for the battery metal. Here's a look an overview of key...

While Africa's lithium resources offer substantial potential for economic growth and job creation, establishing large-scale lithium hydroxide plants requires a reliable supply of power, ...

As Africa accelerates its transition to renewable energy, lithium batteries have become the backbone of solar home systems, commercial energy storage, telecom backup, and industrial ...

The Middle East and Africa (MEA) region is emerging as a pivotal hub in the global lithium-ion battery supply chain, driven by rapid industrialization, urbanization, and a strategic pivot toward ...

Africa's position in the global energy transition is no longer defined by long-term promise but by immediate supply dependence. Across lithium, graphite, manganese, nickel, and cobalt, the ...

Localization of battery value chains is one important trend that is defining the development of the African

automotive lithium-ion battery market.
