Where will Hungary's largest energy storage system be built?

With funds obtained through a previous program, transmission system operator MAVIR is already building the country's largest energy storage system - a 20 MW project in Szolnok, central Hungary, the ministry said. It added that several projects with even bigger capacity will be installed under the tender concluded a few days ago.

How will Hungary's subsidy scheme affect battery energy storage?

The Hungary panel discussion at the event. Image: Solar Media. Hungary's subsidy scheme for energy storage will drive huge growth in battery energy storage system (BESS) deployments over the next few years.

Will Hungarian energy storage projects get subsidy support?

The Hungarian Ministry of Energy has announced that around 50 grid-scale energy storage projects with a cumulative capacity of 440 MW have received subsidy support through a tender launched in February this year.

How much solar capacity does Hungary need?

Hungary has set a target of 12 GW of solar capacity by the start of the next decade. However, grid capacity shortfalls have been dire, hampering primarily the rollout of large-scale solar. The country's revised National Energy and Climate Plan envisages the construction of a total of 1 GW of storage capacity by 2030.

Hungary's solar power share has reached 25 per cent, making storage capacity a strategic priority. At the opening of E.ON Hungary's new Soroksár facility, officials stressed that ...

Battery energy storage systems (BESS) have emerged as a critical priority for Hungary's energy transition. Currently, approximately 60-70 MW of storage capacity is operational, with another ...

Conclusion Hungary's EUR2.1 billion residential battery subsidy marks a decisive step toward a storage-driven energy system. As solar penetration rises and grid flexibility becomes ...

The Hungarian government has earmarked HUF 62 billion (\$169 million) for grid-scale energy storage projects in a bid to facilitate further deployment of renewable energy sources.

# Energy storage investment hungary

1. Background On 21 June 2023, the European Commission approved with the decision SA.102428 a Hungarian state aid scheme to support energy storage facilities for the integration of ...

The government is announcing a residential energy storage program with a budget of HUF 100 billion (EUR 261 million), the Minister heading the Prime Minister's Office said on ...

Energy Savings in Hungary with energy storage grant One of the central objectives of the grant program is to help increase the share of renewable energy in Hungary's final energy ...

The Hungary panel discussion at the event. Image: Solar Media. Hungary's subsidy scheme for energy storage will drive huge growth in battery energy storage system (BESS) ...

On November 21, 2025, the National Energy Agency published the call for proposals under the Jedlik &#193;nyos Energy Program titled "Supporting renewable energy production and energy storage for ...

The government of Hungary has introduced a HUF-100-billion (USD 305m/EUR 260m) programme to support residential energy storage installations to ensure that families with solar ...
