Does Europe have a battery storage market under 20 kWh?

Bonn. The European residential battery storage market under 20 kWh has remained resilient in 2025, with notable growth across mid-sized and emerging markets, according to EUPD Research's latest Electrical Energy Storage (EES) Report; Europe H1 2025.

Why is home energy storage important in Europe?

As battery prices continue to decline and market frameworks become more established, home energy storage will play an increasingly important role in Europe's shift toward a more resilient, consumer-cantered, and decentralized energy system. The landscape in Europe's residential energy storage market remains highly competitive.

Where can I find live European electricity prices and wholesale power prices?

Stay updated with live European electricity prices and wholesale power prices on Argus Media. Access detailed charts, daily updates and comprehensive analysis of electricity prices across Europe and the EU power market.

How many photovoltaic home storage systems will be installed in Europe?

For the entire year, analysts expect more than one million photovoltaic home storage systems to be installed across Europe, with demand increasing further in the second half of the year. "Growing interest in dynamic electricity tariffs and increased self-consumption are expected to boost demand among homeowners," EUPD Research says.
