In March 2025, TotalEnergies announced EUR160 million in new investments to develop six battery storage sites in Germany, totalling 221MW of capacity. These installations are designed to ...

In December 2023, the Federal Ministry for Economic Affairs and Climate Action (BMWK) published its "Power Storage Strategy" to accelerate the development of new capacities.

Green Flexibility and Hansa Battery have signed a framework agreement for the acquisition of five large-scale battery energy storage projects across Germany, with a cumulative ...

The EU installed a record-breaking 27.1 GWh of new battery energy storage system (BESS) capacity in 2025, with Germany and Italy topping the chart again, while Bulgaria emerged as ...

Germany is set to host Europe's largest battery energy storage project, with a new grid-scale facility planned for the Lusatia region. The project is being developed by Fluence Energy, a U.S. ...

Following its groundbreaking ceremony on Tuesday, Eco Stor's 300 MW / 714 MWh project in Förderstedt, Saxony-Anhalt, has now taken the lead in terms of storage capacity, ...

With this breakthrough, Germany is taking a significant step toward competing with global battery manufacturers, fostering a strong European ecosystem for advanced energy storage ...

As the share of renewable energy in the power grid continues to grow, so does the need for efficient electricity storage. In 2024, battery storage systems in Germany grew by approximately ...

VPI, a leading power company backed by Vitol, an energy and commodities company, plans to develop more than 700MW of utility-scale battery storage* in Germany through a joint ...

Germany develops energy storage batteries

Germany's grid-scale battery buildout is accelerating. Installed capacity hit 2 GW last quarter - and could reach 3 GW before the end of 2025. Growth remains slower than in more mature markets, such as ...
