What drives 5G growth in the region?

Driving forces behind 5G growth in the region include a positive economic outlook and forward-thinking regulatory measures for building out network coverage, meaning the stage is set for the telecom market to thrive in the region. Some key markets in the region have already launched 5G Fixed Wireless Access (FWA) services.

Will 5G grow in Sub-Saharan Africa in 2029?

5G subscriptions are projected to reach 180 million in Sub-Saharan Africa in 2029. Driving forces behind 5G growth in the region include a positive economic outlook and forward-thinking regulatory measures for building out network coverage, meaning the stage is set for the telecom market to thrive in the region.

How many countries have 5G?

More than a dozen countries - which, with the exception of Nigeria, are mostly in Eastern and Southern Africa - now have 5G services available. Urban areas are increasingly reaching maximum capacity, given the site density and available spectrum, leading to service disruption.

What is 5G FWA & how does it work in Africa?

This advancement complements traditional fixed broadband infrastructure within the region. Notably, several key African markets, including Angola, South Africa, Nigeria, Kenya, Zambia and Zimbabwe, have already launched 5G FWA services. This shift can be attributed to its cost effectiveness, rapid deployment capabilities and inherent flexibility.
