How much does a rooftop solar system cost?

Mounting system: This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. **Electrical wiring and hardware:** This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.

How much does it cost to install solar panels?

On average, installing solar panels costs \$18,604 for a 6-kilowatt (kW) system before incentives and tax credits. The price range typically falls between \$20,548 and \$30,666, depending on various factors such as location, system size, and the type of panels used. Cost per watt is an essential metric to understand these costs.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400.

Discover how much does installing solar panels cost in 2025. Explore costs, factors, incentives, and get insights on breaking even.

Uses local climate data, your roof measurements, current local electric rates and current solar system cost to generate an accurate solar cost and savings estimate, customized for your home.
