This Solar Powered blinking strobe is self contained and therefore it does not require any electricity. After one full charge, this light should work consecutively for 5 to 7 days.

3.The strobe light will turn on automatically only when the car enters the underground garage or tunnel. And it will turn off automatically after parking for more than 100 seconds.

Solar energy: This type of lamp is powered by solar energy, environmentally friendly, and does not require battery replacement. It is an economical and efficient solution to meet your lighting needs.

It is powered by self-contained rechargeable batteries which are charged by the built-in solar panel. The strong magnetic base is ideal for quick mounting on vehicles, metal posts, or other metal surfaces.
