What does Italy's new EV incentive package mean for the environment?

Italy's Ministry of the Environment has unveiled a comprehensive incentive package worth EUR600 million aimed at stimulating the electric vehicle (EV) market and enhancing air quality in major cities across the country. Under this new initiative, the Italian government plans to offer significant subsidies:

Why is Italy introducing an electric vehicle incentive plan?

By introducing this incentive plan, Italy aims to not only bolster its electric vehicle market but also improve overall air quality in urban regions, showcasing the government's commitment to sustainable transportation and environmental health.

What is Italy's new EV subsidy program?

On August 8, 2025, Italy's Environment and Energy Ministry unveiled a fresh subsidy program worth nearly EUR600 million (approximately \$698 million) to stimulate electric vehicle (EV) purchases. This initiative comes as EV adoption in the country remains notably slow.

What incentives are available for EVs in Italy?

The Italian government provides some incentives for the use and circulation of EVs. These include exemption from the annual circulation tax (ownership tax) for a period of five years from the date the EV was first licensed and, starting from the end of that five-year period, a 75% reduction of the circulation tax.
