See the table below for available information we have about Jinko Solar Co Ltd JKM445N-54HL4R- (V) solar panels. We do our best to provide information such as the JKM445N-54HL4R- (V) panel ...

Better light trapping and current collection to improve module power output and reliability. Excellent Anti-PID performance guarantee via optimized mass-production process and materials control. Optimized ...

Excellent Anti-PID performance guarantee via optimized mass-production process and materials control. Certified to withstand: wind load (4000 Pascal) and snow load (6000 Pascal). High salt mist and ...

Solar Panels 445W (Mono Facial) The Jinko 445W Tiger Neo offers top-tier performance with 22.27% efficiency, using cutting-edge N-Type TOPCon cells and a half-cut monocrystalline layout.

gain increases with backside exposure to light, significantly reducing LCOE. Better light trapping and current collection to improve module power output and reliability. Certified to withstand: 5400 Pa front ...

HOT 100% Multi Busbar Technology Better light trapping and current collection to improve module power output and reliability. Reduced Hot Spot Loss Optimized electrical design and lower operating ...

Certified to withstand: wind load (4000 Pascal) and snow load (6000 Pascal). *This tolerance range applies only to the four-angle distance of the module as indicated above. ©2022 Jinko Solar Co., Ltd. ...

9BB technology decreases the distance between bus bars and finger grid line which is benefit to power increase. Certified to withstand: wind load (2400 Pascal) and snow load (5400 Pascal). Nominal ...
