Should I buy a lithium leisure battery for my RV?

Weight: Better to buy a light lithium leisure battery; otherwise, your RV will be deformed because of the heavy battery, and it even affects the RV driving. Efficiency: The charging efficiency of lithium batteries is much higher than that of lead-acid batteries.

What is a lithium leisure battery?

Some of the bigger models can pull double duty, also storing solar energy for home use. The cells that store the electricity in lithium leisure batteries are made of lithium, iron, and phosphate. The exact chemical formula that these batteries use, which has also become a common shorthand reference when talking about these units, is 'LiFePO4'.

Should you put large-capacity lithium leisure batteries in a campervan?

For Shane, putting large-capacity lithium leisure batteries in his new campervan was a no-brainer. In this article, we'll explain why that's the case and break down the buying process, factor by factor. We'll help you size your battery, choose your battery chemistry, and recommend the best leisure batteries for motorhomes of all sizes.

What is the best campervan leisure battery?

The simple answer is, the best campervan leisure battery is likely to be the one that offers enough power for your needs - and preferably more. This should allow you to power all of your campervan kit, even the more high-powered items, with ease. Having said that, lithium batteries are the most powerful, but cost also comes into play.
