Our foldable solar containers combine advanced photovoltaic technology with modular container design, delivering rapid-deployment, off-grid renewable energy with industry-leading efficiency.

Stores up to 500 kWh of electricity, suitable for various high-demand applications. Equipped with a 3×120 kW inverter (400A), enabling efficient charging of construction machinery and electric vehicles.

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and ...

Efficient Solar Power Generation: Our Mobile Solar Containers are equipped with high-efficiency solar panels that capture and convert sunlight into clean, renewable energy.

LZY Mobile Solar Container System - The rapid-deployment solar solution with 20-200kWp foldable PV panels and 100-500kWh battery storage. Set up in under 3 hours for off-grid areas, construction sites ...

The Solar PV Container is a containerized solar power solution has been designed with the aim of combining solar electricity production and mobility to provide this electricity everywhere around the ...

Leading provider of large-scale photovoltaic power plants, custom folding solar containers, and complete energy storage systems across Southern Africa and international markets.

Powerful advanced application function, using energy storage devices to achieve smooth output, plan tracking, AGC frequency regulation, demand response, peak shaving, demand control and other ...
