-----  
Did solar panel prices hit an All-Time Low in 2024?

EnergySage has released its 20th semiannual report, showing that residential solar panel prices hit an all-time low in 2024. Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30% year-over-year in 2024.

How much does a solar system cost in 2024?

The median price for solar-only systems dropped to \$2.65 per watt in the second half of 2024, down from \$2.80 per watt earlier in the year. That's the lowest price EnergySage has recorded. Battery-backed systems saw an even bigger price drop: home solar +storage quotes fell from \$2.59 per watt in H1 2024 to \$2.40 per watt in H2 2024.

Are solar & storage prices going down in 2024?

According to EnergySage's new Solar & Storage Marketplace Report, prices for both home solar and solar +storage reached record lows in the second half of 2024. EnergySage, an online solar shopping marketplace (and Electrek affiliate) analyzed millions of quotes from installers across the US in its 20th semiannual report.
