Our company not only manufactures compact water treatment plants, but also offers a complete engineering service for their commissioning. Design and manufacture of our water treatment plants ...

With 13 consecutive purification stages, this mobile solution represents all the ...

PAT designs ready-to-use containerized desalination plants that can produce up to 3000 m³/day of drinking water from different sources and with varying salinities.

Manufactured by ImWater Treatment Plants, the system uses 70% less energy than conventional desalination technology, and therefore requires 3x less solar panels.

Because solar adoption at wastewater treatment plants is still relatively new, there is little known about these facilities, including where they are, what drove them to choose solar, and if solar ...

Chunke off-grid solar desalination plant is a plug & play, with containerized option that works off-grid using only solar energy to produce clean water from seawater, brackish water, borehole water, ...

With 13 consecutive purification stages, this mobile solution represents all the processes performed at a drinking water plant, providing safe, soft, and healthy to drink water. Fast production of clean drinking ...

Encapsulated in a shipping container, the solar containerized water treatment plant integrates solar power, advanced water treatment, and automation. Reverse osmosis technology removes impurities, ...

Pure Aqua produces an assortment of containerized and mobile water treatment solutions that are custom-built to fit any application.

Hundreds of these systems are currently in operation, treating water with TDS of up to 10,000 PPM and

Low-pressure solar-powered containerized water treatment plants

producing flow rates of up to 70 gallons per minute. Designed for maximum water output with ...

We have constructed many different custom-made water treatment plants in container adapted to specific demands and wishes. Please contact us for further information and to hear about your options.
