-----

The present invention relates to a resin composition, to a multilayer film, to a back sheet for a photovoltaic module, to a method for manufacturing same, and to a photovoltaic module.

The present invention relates to field of adhesive technology, in particular it relates to a kind of photovoltaic cutting epoxide-resin glue and Its preparation method.

From solar panel adhesives and bonding compounds to electrical component encapsulation materials, Epic Resins is a leading supplier of resins formulated to withstand the intense environmental ...

SABIC, a global leader in the chemical industry, launched today a breakthrough polycarbonate (PC)-based copolymer resin, well-suited for photovoltaic (PV) connector bodies, that meets stricter ...

Composite cutting boards offer the best of both wood and polyethylene in one functional surface Highly durable: scratch, stain, and heat resistant Easy to clean, NSF certified

The resin composition comprises the following components in parts by weight: 40-60 parts of polysilsesquioxane resin, 40-60 parts of epoxy resin, 5-10 parts of curing agent, and 0.01-1 part of...

Plastic cutting boards have a lower melting point in comparison to cookware ... The different films show comparable optical, thermal and thermo-mechanical properties, with slight differences in UV ...

Epoxy resin sealing board is also called epoxy board, and its appearance is shown in Figure 1. It is mainly composed of battery, printed circuit board and epoxy resin.

High-strength modified resin with medium viscosity, featuring high reactivity, high heat deflection temperature, and excellent corrosion resistance for photovoltaic components such as PV brackets ...

The solar photovoltaic assembly comprises the flexible circuit board (1) and a solar cell sheet (8). The solar cell sheet (8) is bonded to the circuit (3) by means of soldering tin.
