Aiming towards a more sustainable plastic use in future BASF and Worldlight's new polyurethane-based PV module frame is the newest addition in the industry. With better efficiency, ...

At CHINAPLAS 2024, BASF will unveil a total solution photovoltaic (PV) frame, co-created with Jiangsu Worldlight New Material Co., Ltd (Worldlight), a global manufacturer of PV ...

Covestro is glad to announce that sales of photovoltaic (PV) modules with frames developed with its polyurethane (PU) composites technology have topped 3 gigawatts. This is a ...

Sunova Solar is at the forefront of solar innovation, supplying high-performance photovoltaic modules for the world's first 10 MW power plant featuring polyurethane composite ...

BASF engineering plastics are widely used in solar applications, such as mounting systems, solar panels and components. These materials offer design flexibility, light weight, corrosion resistance ...

The PV frame is manufactured using an industry-leading total solution that combines polyurethane (PU) composites with a water-based coating solution, resulting in an 85% reduction in ...

Explore innovative PU composites for solar panels, boosting photovoltaic efficiency while reducing carbon emissions

Covestro pioneered the technology in China, the world's largest manufacturer of PV modules. The frames are made using Baydur PU composites, and have good strength, corrosion ...

BASF and Worldlight have developed a new PV module frame based on polyurethane. The manufacturers claim that the new solution offers superior insulation and a longer lifespan than ...

Photovoltaic polyurethane board manufacturers

The polyurethane (PU) composite solar panel frame, jointly developed by Covestro and its partners, provides a new solution for the selection of frame materials for photovoltaic (PV) modules.
