Can storage replace thermal generation in Portugal?

The pursuit of economic viability by storage facility owners will inherently lead to charging during low-cost hours and discharging during hours that are more economically attractive. Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target.

Why is storage important in Portugal?

Storage provides real-time flexibility, enabling participation in balancing markets and maintaining grid stability and inertia, especially in Portugal where these markets are growing. Despite the increase in interconnection capacity between Spain and Portugal, it could experience congestions during non-solar hours.

What is a Casal da Corti's battery?

On the standalone side, the Casal da Corti's facility in Leiria, developed by Infraventus Energy Storage is Portugal's first fully merchant large-scale battery using lithium technology with a power output of 12 MVA and a charging capacity of 24 MWh. Commissioned in June 2025, it trades energy on the spot and ancillary system services.

How many hybrid storage projects are being deployed in Portugal?

Additional hybrid capacity is being deployed, namely by Iberdrola, Greenvolt, Akuo, EDP and GALP, supported by Portugal's Recovery and Resilience Plan (PRR) programme under the "Flexibility and Storage" incentive call. Under this PRR scheme, 41 projects were approved, totalling around 500 MW of new storage capacity and EUR 99.75 million in grants.

Discover comprehensive analysis on the Industrial and Commercial Energy Storage Cabinet Market, expected to grow from USD 4.23 billion in 2024 to USD 12.56 billion by 2033 at a CAGR of 13.2%. ...

As Portugal accelerates its renewable energy transition, understanding energy storage prices has become critical for businesses, policymakers, and homeowners. This article explores ...

Portugal Energy Storage Market Top 5 Importing Countries and Market Competition (HHI) Analysis
Portugal's energy storage import market in 2024 continued to be dominated by key exporters such ...

Price of Industrial and Commercial Energy Storage Cabinets in Portugal

Energy Storage Prices in Portugal Trends Costs and Future Outlook This article explores current market trends, cost drivers, and real-world applications of energy storage systems in Portugal - with ...

Storage can increase self-consumption during non-solar hours, aligned with Portugal's 2030 goals (5,7GW). The seasonality of consumption in certain locations in Portugal, such as ...

How to invest in commercial and industrial energy storage projects In this article, we explore three business models for commercial and industrial energy storage: owner-owned investment,

Looking for the cheapest commercial energy storage supplier in Portugal? With electricity prices surging 58% since 2020 and solar adoption tripling nationwide, Portuguese businesses need battery systems ...

In the period from January to August 2025, Portugal generated 33,107 GWh of electricity, with renewables accounting for 76.9% of total generation--the fourth-highest share in Europe, ...

Battery Energy Storage Cabin Intelligent Manufacturing Project With the core objective of improving the long-term performance of cabin-type energy storages, this paper proposes a collaborative design ...

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've ...
