What is solar energy as a service?

People planning to move in five years or less. Solar Energy as a Service is a way to jump into solar power for your home without the upfront costs or maintenance of owning it. With a PPA, lease, or subscription, homeowners and businesses can lower their electric bills and support renewable energy.

How are consumers maximizing their solar investment?

As utilities increasingly adopt time-of-use rates, increase demand charges, and cut their payments to solar investors who feed power back into the grid, some consumers are limiting their utility costs and maximizing their solar investment through self-sufficient solar energy systems and self-consumption.

Is solar energy as a service right for You?

While tax incentives can bring the price down, it can be years before you see a full return on investment. Solar Energy as a Service (SEaaS) is an alternative that allows you to benefit from solar energy without upfront costs or maintenance hassles. Below, we explore how SEaaS does this and whether it's right for you.

How to invest in solar energy?

These tips from PV Europe are a great place to start. For solar investors who want to receive the greatest return on their investment, they recommend LED lighting, electric water heaters, and thermal heat pumps, among others.
