Aptech Africa recently supplied, installed and commissioned a solar water pump system in Makeni district in Sierra Leone in a project funded by World Hope International.

The solar desalination system is flexible to fit various site sizes, including roof or ground-mounted PV panels. This high-quality solar desalination plant does not require any other installation ...

The completion phase of this project saw the new borehole drilled and a tower built for the whole irrigation water source development that was completed in early April 2021, including the ...

Aptech Africa recently supplied and installed a solar powered water pumping project to six communities in Sierra Leone. This project was funded by UNICEF. This system consisted of a 3 hp ...

World Vision International Sierra Leone is leading a significant project in the BO District that involves drilling and constructing mechanized solar boreholes and installing Lorentz submersible solar pumps, ...

Aptech Africa is proud to deliver an innovative solar water pumping solution to Nar Sarah Clinic in Kabala, Sierra Leone, addressing long-standing challenges of water shortage and costly fuel ...

Construction has begun on the solar pump project, bringing them one step closer to having clean, reliable water. But that's not all--during construction, we're also providing vital health training.

Sierra Leone commits to renewable energy projects to boost electricity access, focusing on hydropower and solar initiatives.

ESLEAP aims to increase energy access across Sierra Leone through a dual approach: the installation of mini-grids in strategic communities and the deployment of stand-alone solar systems in schools ...

Sierra Leone Green Solar Water Pumping Plant

Summary: Discover how energy storage systems combined with solar-powered water pumps are transforming agriculture and water access in Sierra Leone. This guide explores technical innovations, ...
