The Brazilian solar thermal market continues to grow - by a remarkable 11% in 2024. This pushes Brazil ahead of Turkey, making it the second largest market in the world after China. In 2024, 2 million m² ...

Commonly made from silicon cells, photovoltaic systems convert solar irradiation into electrical energy. In Brazil, the most advanced solar thermal project is under development by the Companhia ...

Since 2012, the solar sector has attracted more than BRL 2 billion in investments for the district, generating around 12 jobs and contributing to R\$600 million for public coffers.

While many solar thermal markets around the world face stagnation or decline, Latin America is bucking the trend - Brazil and Mexico are leading the charge, each recording double-digit ...

This article gives a clear account of alumina-based materials used in solar thermal energy systems. It covers solar thermal conversion, how high stability materials are important, and ...

These records highlight the growing importance of solar energy in Brazil's energy landscape and its potential to soon become a major force in the country's energy transition.

Brazil has extensive semi-arid regions with a direct normal irradiation on the order of 6kWh/m²; daily. The greatest potential is located in the São Francisco River Basin and the Sobradinho areas in the ...

The incident has sparked concern among electricity sector agencies, which have been discussing measures in recent weeks. The negotiations involve so-called "inflexible" thermal plants, ...

The conversion efficiency of solar to thermal energy is usually much higher than solar to electrical energy. Therefore, solar thermal energy is considered an attractive solution for thermal ...

Law No. 6891/2021 has stipulated that no less than 50% of energy consumption of the public buildings and

Solar thermal energy brasilia

services in the FD shall be generated by renewable energy by the end of 2026, and no less than ...
