Spanish energy company Vortex Bladeless is developing a new wind power generating technology without blades, gears or shafts, encouraging a new urban opportunity for wind power.

Bladeless turbines are 53% cheaper to make than traditional ones. This percentage goes down to a cost per kilowatt-hour that is lower by up to 45%, making them very attractive for areas ...

Imagine rooftops with solar panels soaking up the sun by day, while bladeless turbines quietly hum in the wind. Together, they could create hybrid systems that deliver steady, round-the ...

To this end, Spanish company "Vortex" has come up with a viable solution: windmills without the dangerous blades. This might sound like an impossible feat, but the new equipment actually has an ...

One of these innovations, which comes from the Spanish company Vortex Bladeless, is a bladeless wind turbine. But, how is it possible to generate energy from a cylinder that has no blades?

Vortex Bladeless Ltd. is a Spanish technology startup company that is developing a specific type of wind power generator without rotating blades or lubricants. [1]

Madrid, Spain -- Wind energy has long been synonymous with giant, rotating blades cutting across skylines. But a Spanish startup, Vortex Bladeless, is rewriting that image with a ...

A Spanish startup is reinventing wind energy with bladeless wind turbines that generate electricity using vibrations instead of spinning blades. This revolutionary idea promises quieter, ...

Eco-friendly bladeless small wind energy. Startup technology Vortex wind power for on-site generation, the low-cost wind turbine which is not a turbine!

Spain wind bladeless solar power generation

Finally, Spain's Bladeless turbines are certainly part of a larger movement toward innovation in renewable energy technology. From solar water heating innovations to electric vehicles, ...
