Do I need a solar inverter shade cover?

If your solar inverter is exposed to direct sunlight, your warranty with the inverter manufacturer could be void. In this case, we recommend using a solar inverter cover to protect your inverter and its warranty. An inverter shade cover is a valuable accessory for your solar inverter.

Is Bunnings solar inverter shade cover suitable for all solar models?

While the solar inverter cover Bunnings offers might be a suitable option for some, it may not be compatible with all solar inverter models. A well-designed solar inverter shade cover will cater to a wide range of solar inverter types, making it the more versatile and reliable choice for your solar power system. Professional Installation:

Why should you choose a solar inverter shade?

No matter what kind of solar setup you have, we have an inverter shade solution that will protect your investment and ensure your solar system operates without a hitch. Optimal Airflow: Our design includes ample clearance on all sides, ensuring optimum airflow to keep your inverter cool and efficient.

How do I provide shade for my solar inverter?

The cheapest option available for providing shade for your solar inverter is a plastic awning from Bunnings. We don't recommend this option for a few reasons. These awnings let some light through and don't fit tightly around your solar inverter.

Your solar system inverter is a critical component of your system--and to ensure it's protected from the elements and to optimise its performance, it's a good idea to place it somewhere ...

Add a shade awning to your inverter to ensure it operates at the highest efficiency for longer time periods.
