When looking for a house to live in, recently, I noticed that those with solar panels made me VERY ill, within seconds. As I own a rf (radio-frequency radiation) meter (a Cornet 88T Plus), I began measuring these sorts ...

In this review, we try to highlight some of recent research undertaken to use solar cells in powering various types of biomedical devices. The areas covered include implants, electronic skin, radio ...

Can photovoltaic installations have negative health impacts? This question is often asked by people who want to practice sound ecological citizenry and who also care about the health of their family.

Sunlight is a representative environmental factor that considerably influences the physiological activity of our bodies. The molecular mechanisms and detrimental effects of ultraviolet rays (UVR) on skin have been ...

Is solar power safe, or bad for your health? Learn about solar panels, EMF radiation and the dangers of dirty electricity.

In a human, UVB rays are absorbed and turn into vitamin D3 photons, which initiate a chemical reaction in the kidneys and liver to convert sunlight to its final form, calcitriol: an essential nutrient that helps power our ...

Photovoltaic (PV) energy conversion is one of the most promising candidates for implantable applications due to their higher-power conversion efficiencies and small footprint. Herein, the latest implantable energy harvesting ...

The solar panel system, or photovoltaic system, is the real problem because it generates dirty electricity that eventually emits EMF radiation into the house. Radiation can also be the cause of concern ...

Solar energy is something that has increasingly provided environmentally friendly options for generating

The back is the photovoltaic electronic panel of the human body

electricity. However, there are studies that reveal that solar energy has health effects on ...

The six-month study gave 32 volunteers in Switzerland an arm-strapped box covered with filters simulating human skin containing solar panels, batteries, and electronics.
