Do solar panels damage your roof?

While solar panels themselves will not inherently damage your roof, an improper installation can lead to problems down the line. It is crucial to ensure that the installation is done correctly by a professional, or with thorough research and proper planning if you choose to do it yourself.

What happened to rooftop solar panels?

In 2013, a fire broke out at a 300,000 square foot meat warehouse in Delanco, New Jersey. Rooftop solar panels were present. Firefighters reported that the panels caused them to change tactics while fighting the fire. The building was eventually destroyed after 29 hours. Firefighter's opinion: 'Do I think we'd have had a different outcome if we could get on the roof? Sure.'

What happens if solar panels are not installed properly?

Issues such as leaks, broken tiles, and structural damage can occur if the panels are not installed properly. To avoid roof damage, working with experienced installers who understand the intricacies of solar panel installation is essential. They will know how to secure the panels without compromising the integrity of your roof.
