Harness the power of the sun with Aptera. Designed with ~700 watts of integrated solar cells, drive up to 40 miles per day completely off the grid and enjoy 400 miles of range per full charge.

Aptera, a startup from California, hopes to finally start production of its solar-powered EV later this year with a starting price of \$40K. The three-wheeler achieves a claimed 400-mile range...

The US startup Aptera deploys embedded solar panels to raise the bar on autocycles in the electric vehicle market.

Aptera, a startup from California, hopes to finally start production ...

At CES 2025, attendees got to ride in the most radical electric vehicle concept yet: a three-wheeled, solar-powered autocycle from California-based startup Aptera.

For the first time at CES 2025, Aptera demonstrates the solar panels covering the electric car. They're on the hood, dash, roof, and hatch of the vehicle.

Nearly two decades in the making, the otherworldly three-wheel Aptera is headed to production this year as a \$40,000, 400-mile EV that can capture up to 40 miles worth of free solar ...

California-based Aptera plans to bring its three-wheeled solar electric vehicles to Florida in 2026, with a launch price reportedly around \$40,000. The "Solar Sunbather" can travel up to 40...

Discover the Aptera, the revolutionary three-wheeled solar electric vehicle finally nearing production. Learn about its 400-mile range, solar charging capabilities, and unique design.

Built by a brand called Aptera Motors, a startup from California, the futuristic EV is powered by a 42 kWh battery and solar panels that can add up to 40 miles of range per day, or ...

Three-wheeled solar panels

Aptera Motors is on a mission to revolutionise electric vehicles from the car design to the technology. They envision cars that are fast and sleek and topped with solar panels so that you do ...
