In 2024, the Vatican announced a new solar plant to be built on Church-owned land outside Rome, positioning the city-state to become the eighth country in the world to run entirely on renewable ...

On May 29, 2025, the Vatican City officially transitioned to solar power, marking a significant shift in the European energy landscape. The heart of this change is located at Santa Maria ...

The Vatican City, the heart of the Catholic Church and a symbol of religious heritage, is becoming a beacon of modern sustainable practices with its adoption of solar energy.

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

The project aims to meet the full energy needs of both the Vatican State and Vatican Radio using solar technology integrated with agricultural activity.

With rooftop solar installations generating 221 MWh annually, leaders like EcoVolt Solutions dominate this niche. Their stackable battery units fit within 1.2m<sup>2</sup>; spaces - crucial for urban monasteries.

This tradition got a recent boost. The late Pope Francis' goal of powering the Vatican by 100% solar energy is happening now as Vatican City becomes the first fully powered solar state.

Discover how photovoltaic energy storage transforms residential power management, with real-world insights from the Vatican's green initiatives. Explore cutting-edge solutions balancing environmental ...

Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside ...
