500kW power output with modular design, supporting expansion up to 1.5MWh (customizable based on your product specs). Seamless integration with existing inverters for hybrid energy systems.

Easily upgradable from 500kW to 1MW of energy storage, storing up to 3.8MWh of energy, enough to power an average 3,600 homes for one hour.

Featuring a split PCS and battery cabinet design, it offers 1+N scalability and integrates seamlessly with solar PV, diesel generators, the grid, and utility power.

An advanced containerized energy storage system designed for maximum reliability and operational efficiency. This modular battery storage container delivers seamless power management with ...

This containerized energy storage system not only integrates the most advanced technology, but also becomes the global leader in the field of energy storage with its excellent performance, efficient ...

Plug-and-play container design allows for easy installation with minimal on-site labor. Features LiFePO4 batteries, a safe, reliable, and long-life energy source. Simple expansion by connecting multiple units ...

This modular battery storage container offers exceptional power management with cutting-edge intelligent grid integration capabilities, ensuring seamless energy distribution and utilization.

The business covers the R& D, production and sales of PV modules, residential, commercial and large scale solar plants. We supply turn-key service for domestic customers and all the materials for ...

Advantages: Intelligent scheduling enhances energy utilization efficiency, reduces manual intervention, provides comprehensive protection for components to extend system lifespan, and ensures ...
