Oversizing refers to installing a larger system than required to meet your immediate energy needs. In this article, we will delve into the concept of oversizing and explore its benefits, considerations, and ...

Recent NREL studies show that improper bracket sizing causes 12-18% efficiency losses in residential installations. But here's the kicker - most DIY solar enthusiasts treat brackets as an afterthought ...

Installation of solar panels should be efficient, so their physical size can be an issue. You want to be able to put as many panels as possible in the least amount of space.

Do I need to tweak my solar system sizing? Research the details of your utility's net metering program to see if you need to tweak your solar system sizing to get the most value out of your panels.

If a Category 5 storm ever made it all the way to my place the roof would likely be gone. I think my install should be OK for up to 120 MPH winds, as long as the roof stays on. The panels ...

If you find that your rooftop is not large enough, you will have to either choose a higher efficiency panel or consider reducing the size of your system. On the other hand, if you still have plenty of room to ...

Proper bracket alignment can reduce soiling losses by up to 15% through optimized rainwater runoff angles. From material selection to installation precision, photovoltaic panel brackets play a crucial ...

When panels are installed too closely together, it can increase structural stress between them, compromising the long-term stability and safety of the system. A well-designed spacing ...

So, if you have problems with a photovoltaic bracket after purchase, don't panic. Just follow these steps: identify the problem, take photos if there's structural damage, contact our support team, and let us ...

What should I do if the photovoltaic bracket is too large

The bracket spacing directly affects the power generation efficiency of the photovoltaic array. Too small a spacing will cause shadows and reduce power generation; while too large a ...
