What is the best home backup power?

If your primary goal is home backup power, step up to the EcoFlow Delta Pro. It is designed specifically for home backup power use, and can be wired directly into your home breaker panel with an optional transfer switch kit. It has an impressive 3.6 kWh power capacity, which can be expanded to up to 25 kWh.

How do I choose a portable power station?

A portable power station's maximum output tells you the total watts it can produce, which determines what you can and can't power with it. Look for a power station that can handle the combined wattage of the electronics you plan to plug into it.

Why do you need a portable power station?

Why Trust Us? Portable power stations are handy for backup power during outages, off-grid electricity for an RV, or simply charging your laptop and phone while working remotely. They're effectively large bundles of rechargeable lithium-ion batteries, which provide a quiet, exhaust-free alternative to noisy gas-powered portable generators.

Do portable power stations have a weather rating?

However, other portable power stations do not have a weather rating, so it's important to check if you plan on using your power station outdoors. Regardless, it's a good idea to protect your power station from any water or severe weather conditions as much as possible.

The EcoFlow Delta Pro 3 is a large, high-capacity power station intended for home backup. Its 4,000 watt output and 4,096 Wh capacity allow for high draw appliance use and extended ...
