The turbines for Phase 1B are located in the Fengxian District, Shanghai, China, with exact coordinates for Phase 1 being 30.7566, 121.8196. The wind farm is owned by Shanghai Electricity Xinda...

Location is critical to the overall success of a wind farm. Additional conditions contributing to a successful wind farm location include: wind conditions, access to electric transmission, physical ...

Use an Interactive map to find the best places for wind turbines around the world. 30 000 places were carefully found using machine-learning algorithms and tons and tons of data of different parameters.

In this article, we'll explore a Wind Farm Locations Map to give an overview of wind farms across the United States and highlight the role of wind energy in powering communities.

The tool allows you to explore wind farms in any country using a world map, in addition it allow filtering wind farms by number of turbines and installed capacity.

Interactive map of wind farms in the US. View the largest projects, track new developments, and explore capacity data across all states.

To access additional data, including an interactive map of global wind farms, a downloadable dataset, and summary data, please visit the Global Wind Power Tracker on the Global Energy Monitor website.

Wind turbine map, always up-to-date with more than 300k turbines worldwide. Open-street-map (OSM) provided info boxes with turbine type, manufacturer, rated power, hub height, rotor diameter and ...

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.
