The battery energy storage market continues its rapid growth, reshaping power systems worldwide. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook ...

Updated annually to reflect the latest energy data, technology and market trends, and government policies, it explores a range of possible energy futures and their implications for energy security, ...

BAKU, AZERBAIJAN (November 15, 2024) - At COP29, countries including UK, Uruguay, Belgium and Sweden committed to increasing the amount of global energy storage sixfold compared to 2022 ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids.

Despite lowering its forecasts due to US-led tariff and policy disruptions, BNEF says 2025 will be a record-breaking year for energy storage.

Explore how energy storage growth is driving demand for battery materials, copper, aluminium, and vanadium in the clean energy transition.

Dan Finn-Foley, Wood Mackenzie head of energy storage, said: "2020 was a record year for global energy storage. The market exceeded 15GW/27 GWh in 2020, increasing 51% in GWh ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector ...

We interviewed energy leaders from 17 countries, exploring recent progress in terms of technology, business models and enabling policies. We showcase these in 10 case studies.

To support the global transition to clean electricity, funding for development of energy storage projects is

World energy storage

required. Pumped hydro, batteries, hydrogen, and thermal storage are a few of the...
